USDA Announces Changes In Food Stamp Rules

ATLANTA, Ga. — The food stamp regulations have been amended to offer states a simplified procedure for verifying the income of nonpublic assistance households receiving Social Security benefits, Russell H. James, Southeast regional administrator of the U. S. Department of Agriculture's Food and Nutrition Service (FNS), reports.

James said the amendment gives cooperating state agencies the option of verifying Social Security income reported by food stamp applicants through the Beneficiary Data Exchange (Bendex), an automated data processing system operated by the Social and Rehabilitation Service, U. S. Department of Health, Education and Welfare.

State agencies using the system are also authorized to approve food stamp applications, based on Social Security income reported by the household pending receipt of the verifying information through the Bendex system.

He added that 38 states are currntly fully utilizing the Bendex system to verify Social Security income for public assistance households.

"The Appomattox County ASCS Office is ready to give farmers all possible help in correctly certifying their acres," Mr. Ford said. ASCS personnel will be glad to answer any questions or help with problems."

Producers who certify in time for data to be processed will get checks for their preliminary set-aside program payments as soon after July1 as possible.

The County ASCS Office also provides measurement service, at cost,to help producers determine acreages at planting or at certification time.

"Most producers are familiar with our system of certification, followed by spot checks around the county to verify accuracy of these statements," Mr. Ford said. "Producers can certify acreages once they complete their planting operations if they do not plan to make any changes. The important thing is to certify accurately and as soon as practical for early payments. But they must remember no changes can be made after certification."

Concord Rescue Squad Answers 31 Calls

The Concord Rescue Squad has now moved into their new two-bay crew hall located at Thomas Terrace near Concord. Standing by in the photo above are Jerry French, on the left, and Wayne Lankford, Captain of the Concord Squad, on the right.

The month of April was a busy month for the Concord Resuce Squad in many ways.

The squad responded to 31 emergency calls during the month with 28 persons in need of first aid . Auto accidents topped the list for the month with 6 calls for the accidents and 12 persons injured. Minor cuts and routine transports accounted for 5 calls each and there were 2 standbys. One with the Concord Fire Department and one at a motorcycle race track. Rounding out the month with one call each were: fights, strokes, heart attack, hemmorage, and false alarm. General illness required transports to the hospital for 8 persons.

Along with the heavy load of calls, the squad also put their second ambulance into service and moved into their crew hall. The crew hall is a 2-bay installation at Thomas Terrace, near Concord, and is certainly located to best serve the entire area covered by the squad in a matter of minutes. The new ambulance, now in operation, is fully equipped to handle virtually any situation short of heavy duty rescue.

Two new members, Carroll D. (Toney) Tyree, and Jerry W. French, were welcomed into the squad after completion of their Standard and Advanced First Aid courses at Tyreanna Church. This class was also conducted by the rescue squad and instructed by Second Lieutenant Bill Mann, Training Officer. Seventeen area residents completed this course. A junior class was also started in April for the Concord Boy Scout Troop. Lt. Bill Mann is instructor for this class as well.

During April, Concord Rescue Squad traveled 689 miles in response to the 31 calls and expended 97 man hours.
